

Candidate Details

Ballot paper name	SARKER, Shouv
Candidate name	Shouvojit SARKER
District	City of Canning
Nominating for	Councillor for Beeliar Ward
Election type	Ordinary
Enrolment status	SARKER, Shouv is eligible to stand for election as a resident of the City of Canning.

Our rates keep rising, but the quality of services keeps falling. We need to go back to basics, and Willetton needs a strong Councillor to do so. I know I am that person, I just need your support.

I am a dedicated local resident who **volunteers for neighbourhood watch**, attended many Council meetings and petitioned to **keep our rates low** with 1,100+ signatures. I work full-time as a software engineer and **have held several leadership roles** including serving as a Project Leader at CSIRO.

Alongside **stopping excessive rate hikes, security is a big priority** for me. I have been a victim of home burglary, I know home & car break-ins have become frequent, we need to reduce them. I will work hard to deliver **better street lights, more CCTV rebates and effective ranger patrols**. I also want to **address traffic issues** and keep **verges & parks well-maintained**. I am not a member of any political party. I will only be representing our community's views and interests.

Let me be your voice, Vote 1 Shouv Sarker.

Dear Residents of Willetton,

You may remember me from my election campaign last year. I may have spoken to you in person, dropped a flyer in your letterbox or you may have been kind enough to put up a sign for me. A lot of you voted for me, they were votes for **low rates, better security, safer roads and improved Council services.**

I am campaigning again to be your voice this year, and I acknowledge there are a lot of areas where our Council should improve. **Our rates keep going up but not the quality of services, security remains a key issue in our suburbs.** I want to bring change for the better, and I need your support to do so.

I am a **Software Engineer** and like many of you, a **local resident & ratepayer.** I own a home in this city where I live with my wonderful family. I have held a number of roles across public and private sectors, including Project Leadership role at our **national science agency, CSIRO.** I have also attended numerous council meetings and have knowledge about how our council operates. I have been a **strong voice against excessive rate rises,** particularly during the current cost of living crisis. I am biased towards action, so instead of just voicing my opinion I took initiative to do a petition that received more than 1,100 signatures.

Alongside stopping excessive rate hikes, security is a big priority of mine. I acknowledge the main responsibility lies with WA police, but from **better street lights to CCTV rebates and ranger patrols,** there are so many ways our Council can help. I also want to make our **roads safer** and keep our **verges & parks well-maintained.**

I am running for Council to **get things done,** I have a clear vision for my policies and want to drive **change for the better.** I am not a member of any political party. I am an **independent voice** for our community and if elected, I can vote on issues based on their merits without any bias or pressure. If you want a **dedicated, energetic and passionate** advocate for our community in Council, **Vote 1 Shouv Sarker.**
